Sprint 6 Progress Update

Completed Tasks

- Grade Assessment: Successfully replaced the modal with a typing-in-table feature, enhancing the user experience.
- Back-end of Login and Sign-up: Completed the back-end development for login and sign-up, including token implementation.
- Dark Mode Modification: Modified the dark mode to improve the overall aesthetic and usability of the application.
- Logout Modification: Updated the logout feature to ensure a seamless and secure user experience.

Ongoing Tasks

- CRUD Operations: Currently working on implementing CRUD operations for courses, assessments, and grade entries.

SPRINT RETROSPECTIVE

What Went Well

- The implementation of the typing-in-table feature for grade assessment received positive feedback from stakeholders.
- The back-end development for login and sign-up was completed ahead of schedule.

What Could Be Improved

- More thorough testing is required to ensure that the CRUD operations for courses, assessments, and grade entries are bug-free and meet the required standards.
- The team could benefit from more frequent code reviews to maintain consistency and quality.

What Needs to Be Done

- Back-end of CRUD Operations: Complete the back-end development for CRUD operations in courses, assessments, and grade entries.

Email Authentication: Implement email authentication to enhance the security and verification process for users.
